2. The prior art of record fails to teach or suggest the claimed invention individually or in combination the limitation of providing an interface element allowing the first user to further associate the annotation with a second data object, whereby the annotation annotates both the first data object and the second data object, and wherein the first user is not authorized to view the second data object; providing an interface allowing a second user to view query results including the second data object, wherein the second user is authorized to view the second data object, as set forth in claims 1 and 20.
3. The closest prior art, Evans taken with Palomo describes an EMR system which provides healthcare providers with an intuitive interface that enables them to capture and analyze patient data quickly and efficiently. 5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
